# Sustainability

# Active ownership

Our engagement in active ownership is to protect unit holders' common interest, to promote the long-term development of companies and financial markets and to advocate confidence in the equity market.

We exercise our position as active owners in nomination committees, at the Annual General Meeting of companies where the funds are large shareholders and through direct dialogue with the companies.

In 2022, we...

- Participated in 3 nomination committees in the fund's holdings
- Voted at 24 annual general meetings, corresponding to 75% of the total number of holdings in the fund

# Lannebo's climate target

Lannebo has committed to a climate target that requires 100% of the companies in material sectors within its portfolios to establish science-based emissions reduction targets by 2040, in accordance with SBTi (Science Based Targets initiative) or similar frameworks.

This target reflects Lannebo's dedication to promoting sustainability and combating climate change, and underscores that businesses have a responsibility to operate in an environmentally conscious and socially responsible manner.

Share of the fund's holdings that have set science-based climate targets

# Carbon footprint

The Weighted Average Carbon Intensity measures the carbon intensity of a portfolio, which indicates its exposure to carbon-intensive companies. Companies with higher carbon intensity may be more likely to face carbon-related market and regulatory risks, making this metric an indicator for a portfolio's exposure to climate change-related risks compared to other portfolios or benchmarks.

The calculation of Weighted Average Carbon Intensity is made by dividing scope 1 and 2 emissions by sales in million SEK. Then, multiplying the result by the portfolio weight. This measure aligns with the EU's non-financial reporting directive and TCFD recommendations.

## Weighted average carbon intensity\*

Date	Fund	Benchmark
03/31/2023	3.2	4.2
12/31/2022	5.1	3.5
06/30/2022	4.5	4.2
