

Lannebo Småbolag

Key Investor Information Document

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

ISIN code: SE0010662817

Share class: SEK C

Lannebo Fonder AB, registration no 556584-7042

Objective and investment policy

The fund invests in equities of small and medium-sized listed companies in the Nordic region with a focus on Sweden. The companies' market capitalization at the time of investment may not exceed 1 per cent of the Swedish stock market's total market capitalization. At the end of 2019 this amounted to a market capitalization of around SEK77bn.

The fund does not invest in companies that violate international conventions or in companies that produce and/or distribute controversial weapons. The fund also refrains from investing in companies in which more than 5 per cent of the company's turnover comes from the production and/or distribution of tobacco, cannabis, alcohol, weapons, gambling or pornography. The fund also refrains from investing in companies in which more than 5 per cent of the company's turnover comes from extracting of fossil fuels (coal, oil and gas).

The fund is managed according to Lannebo Fonder's investment philosophy of active asset management. This means that we focus on fundamental company analysis and valuation of individual stocks in companies whose business models we understand. We are independent in our management of, and in our decisions regarding, the fund. Focus is placed on each of the fund's individual investments and its outlooks. The most attractive shares, according to the managers, are the largest holdings in the fund, regardless of the holdings in the fund's benchmark. We try to avoid factors that affect stock prices

in the short term, resulting in that we invest in companies where we may have a qualified opinion about the company prospects where valuations are considered attractive enough.

Deviations from the benchmark index can be both larger and smaller, please see the fund's annual report or information brochure for an account of the fund's actual deviations in relation to its benchmark over time. The objective is to over time generate good returns which also exceeds the benchmark index taking into account the risk level.

The fund normally pays no dividend and all income is reinvested in the fund.

This document is valid for share class SEK C traded in Swedish kronor and is aimed at distributors providing investment advice on an independent basis or portfolio management and has a fee adapted to the fact that distributors may not receive and retain compensation from the fund company. The fund normally pays no dividend and all income is reinvested in the fund.

Purchase and sale of fund units may normally be made every banking day.

Benchmark: Carnegie Small Cap Return Index Sweden.

Recommendation: The fund may not be suitable for investors who plan to withdraw their money within five years.

Risk and reward profile

Lower risk

Higher risk

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Typically lower rewards

Typically higher rewards

About the indicator: The risk and reward indicator illustrates the relationship between risk and potential returns from an investment in the fund. The indicator is based on how the fund's value has changed over the last five years.

The fund's investments: The fund belongs to category 6, which means a high risk of both increases and decreases in value. Category 1 does not mean the fund is a risk free investment. Over time the fund may shift to both the right and left on the indicator scale. This is because the indicator is based on historical data, which is not a guarantee of future risk and returns.

The equity market is generally characterized by high risk, but also the potential for high returns. The indicator mainly reflects the increases and decreases in the value of the shares that the fund invests in.

Risk factors not shown through the indicator: The liquidity risk, i.e. the risk that the securities may not be sold at the intended time without a major reduction in price or high costs, is not fully reflected in the indicator. The fact that the fund may hold large positions in smaller companies implies that the level of risk may be higher than shown by the indicator during periods when the liquidity in the market is limited. This places greater demands on the management of liquidity and requires that periodically the fund have an appropriate mix of shares in order to manage liquidity risk in an effective manner.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
<i>This is the maximum that might be taken out before investing/before the proceeds of investments are paid out.</i>	
Charges taken from the fund over a year	
Ongoing charges	0.83%
Charges taken from the fund under certain specific conditions	
Performance fee	None

Your distributor can provide you information regarding current fees.

The charges are for the calendar year 2019 and may vary from one year to another. The ongoing charges refers to the current management fee the fund manager takes out. The annual report of the fund will contain details of the exact charges for each financial year. The ongoing charges may vary from one year to another. The charges do not include variable costs for securities trading (brokerage fees) or any performance fee.

The charges cover the fund's costs, these charges reduce the potential returns. Ongoing charges does not include compensation to certain distributors who instead charge the customer directly.

Past performance

The fund's performance (return) is calculated after deduction of ongoing charges. Any entry and exit charges have not been taken into account. The performance for all years has been calculated in Swedish kronor and with dividends reinvested in the fund.

The fund's benchmark is also presented in the chart. The fund does not intend to track its benchmark.

Past performance is not a guarantee for future performance. The fund was launched in 2000. Share class SEK C started 3 July 2018.
