Objective and investment policy

The fund invests in listed equities in the Nordic region.

The fund does not invest in companies that violate international conventions or in companies that produce and/or distribute controversial weapons. The fund also refrains from investing in companies in which more than 5 per cent of the company's turnover comes from the production and/or distribution of tobacco, cannabis, alcohol, weapons, gambling or pornography. The fund also refrains from investing in companies in which more than 5 per cent of the company's turnover comes from extracting of fossil fuels (coal, oil and gas).

The fund is managed according to Lannebo Fonder's investment philosophy of active asset management. This means that we focus on fundamental company analysis and valuation of individual stocks in companies whose business models we understand. We invest in companies we can see great potential for profit growth and growing dividends over time, which we can find in companies with good sales growth and strong cash flows. We invest predominantly in companies in which the company's future is possible to assess and where the valuation is attractive. We are independent in our management of, and in our decisions regarding, the fund. The most attractive shares, according to the managers, are the largest holdings in

the fund, regardless of the holdings in the fund's benchmark. The fund normally invests in 20 to 30 companies.

Deviations from the benchmark index can be both larger and smaller, please see the fund's annual report or information brochure for an account of the fund's actual deviations in relation to its benchmark over time. The objective is to over time generate good returns which also exceeds the benchmark index taking into account the risk level.

This document is valid for share class SEK C traded in Swedish kronor and is aimed at distributors providing investment advice on an independent basis or portfolio management and has a fee adapted to the fact that distributors may not receive and retain compensation from the fund company. The fund normally pays no dividend and all income is reinvested in the fund.

Purchase and sale of fund units may normally be made every banking day.

Benchmark: VINX Benchmark Cap SEK_NI.

Recommendation: The fund may be unsuitable for investors who plan to withdraw their money within five years.

Typically lower rewards					Typically higher rewards	

About the indicator: The risk and reward indicator illustrates the relationship between risk and potential returns from an investment in the fund. Since this fund has been in existence for less than five years, the indicator is based on the available history for the fund supplemented by historical relevant comparative data.

The fund's investments: The fund belongs to category 6, which means a high risk of both increases and decreases in value. Category 1 does not mean the fund is a risk free investment. Over time the fund may shift to both the right and left on the indicator scale. This is because the indicator is based on historical data that is not a guarantee of future risk and returns.

The equity market is generally characterized by high risk, but also the potential for high returns.

Risk factors not shown through the indicator: The indicator reflects the fund's most important risks.
