WHAT IS THIS PRODUCT?

Type: UCITS

Term: There is no maturity date for the fund. The fund company have a right to close the fund and redeem the units, please see the prospectus for more information.

Objectives: The fund invests in equities of small and medium-sized listed companies in Europe. The management of the fund's assets is characterised by a sustainability orientation, with the aim of making sustainable investments with an environmental focus. The companies' market capitalization at the time of investment may not exceed EUR 15 bn or the equivalent in another currency. Up to 10 per cent of the assets may be invested in companies with registered office in Europe, but not listed in Europe and/or without restriction to the size of the companies' market capitalization. The fund does not invest in companies that violate international conventions or in companies that produce and/or distribute controversial weapons. The fund also refrains from investing in companies in which more than 5 per cent of the company's turnover comes from the production and/or distribution of tobacco, cannabis, alcohol, weapons, gambling or pornography. The fund also refrains from investing in companies in which more than 5 per cent of the company's turnover comes from extracting of fossil fuels (coal, oil and gas). The fund also selects companies that contribute to the fund's sustainable investment goal. These companies are identified through the managers' own sustainability analysis, which takes into account how well a company's operations contribute to the green transition, which i.a. is required to achieve the goals in the Paris Agreement. This is done by the fund investing in companies that contributes to or enables a green transition. The assessment is based on environmentally sustainable goals as defined in the EU's taxonomy regulation, or environmental goals according to the UN global Sustainable Development Goals. The fund is managed according to Lannebo Fonder's investment philosophy of active asset management. This means that we focus on fundamental company analysis and valuation of individual stocks in companies whose business models we understand. Our focus is companies with strong business ideas, stable balance sheets, and great potential, where we can invest at an early stage. We are independent in our management of, and in our decisions regarding, the fund. The most attractive shares, according to the managers, are the largest holdings in the fund, regardless of the holdings in the fund's benchmark. The benchmark index is MSCI Europe Small Cap Climate Paris Aligned Index. The fund normally invests in 30-50 companies. Deviations from benchmark index can be both larger and smaller, please see the fund's annual report or prospectus for an account of the fund's actual deviations in relation to its benchmark over time. The objective is that over time, taking into account the level of risk and by making sustainable investments with a environmental focus, generate a stable return. The management of the fund may be compared with the fund's benchmark. Dividend is normally is reinvested in the fund. Purchase and sale of fund units may normally be made any banking day.

Intended Retail Investor: This fund may be suitable for those who plan to hold their investment for at least five years and who understand that the money invested in the fund may increase or decrease in value and that there is no guarantee that you will get back all the capital invested. To invest in the fund, you do not need to have any particular prior knowledge or experience of funds or financial markets.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It

shows how likely it is that the product will lose money because of movements in the markets. We have classified this product as 4 out of 7, which is a medium risk class. This means that the fund has a medium risk of increases and decreases in unit value. The indicator mainly reflects the increases and decreases in the value of the shares that the fund invests in.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the risk indicator shown. Risks not captured by the risk indicator: liquidity risk, the fund may hold large positions in smaller companies, which means that the level of

risk when liquidity in the market is limited may be higher than indicated by the indicator.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the fund and an appropriate benchmark over the last 10 years. Markets may develop quite differently in the future.

Recommended Holding Period: 5 years

Example Investment = SEK 100,000

WHAT HAPPENS IF LANNEBO FONDER AB IS UNABLE TO PAY OUT?

A fund investor owns fund units in a fund. The fund is managed by the fund company, while the fund's securities are held in a separate custodian. The depositary keeps the fund's securities separate from its own assets. In the event of bankruptcy of the depositary or the fund company, the fund's securities are protected from bankruptcy.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amount that are taken from your investment to cover different types of costs. These amount depend on how much you invest, how long you hold the fund and how well the fund does. These amounts are illustrations based on example investment amount and different possible investment periods. If the fund is part of another product, e.g. unit-linked insurance, there may be other costs for that product.

We have assumed:

-In the first year you would get back the amount that you invested (0% annual return). For the 5 years we assumed the product performs as shown the moderate scenario.

-100 000 SEK is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	SEK 2,260	SEK 16,450
Annual cost impact (*)	2.3% each year	2.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 8.8% before costs and 6.3% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
